ABOUT IRINA SOKOLOVA

Irina has been in the healthcare industry since 2007, helping people of all ages with anything and everything they need to bring them back to optimal health. She has been working as a registered nurse for 4 years and her recent experience has been in the cardiac ICU taking care of post open heart surgery patients. Irina loves what she does and is very passionate about helping people and providing the best care possible.

ABOUT SVETLANA TAGGART

Svetlana Taggart is a Registered Nurse who has over 30 years of unique and invaluable experience, with a focus in post cosmetic surgery patients. Lana has worked for one of the top plastic surgeons in the United States for the past 15 years, and has taken care of all of his patients post surgery. Lana strives to ensure that each patient has a quick recovery and is well taken care of during their post op care.

Concierge Nursing Care

With Lana Taggart and Irina Sokolova

1 on 1 Post Op Care

Concierge Nursing Care offers patients 1 on 1 pampering during those first few critical nights following surgery. Our nurses are licensed RN's with specialty training in critical care and plastic surgery. We will meticulously follow your surgeon's post operative protocol and communicate your progress with them. Our nurses will pamper, support, and safely guide you through your first and/or second post operative night so you can rest, relax, and recover from surgery.

We are caring, knowledgeable and consider patient safety our #1 priority.

Post Surgery Care

Once your surgery is completed, we will meet you in the recovery room and thoroughly review your immediate post op progress with the recovery room nurses. They will detail your pain management, blood pressure, respiratory status and post op nausea, so we will continue to help you recover more comfortably in the hotel.

Once you are stable we will personally transport you to the hotel and make you comfortable in your bed.

We will administer any medications you may need as well as manage your drains and vital signs throughout the night.

We Are Here For You

We will sleep in your room, so, if you need anything we will be right there for you.

Your recovery will be communicated with your doctor so they are aware of your progress. The next morning we will transport you to your doctor's office for your 1st post op visit by 8:00 AM.

If you choose to have a 2 night concierge nursing service, we will bring you back to your hotel for 1 more night, and then transport you to your doctor's office for a 2nd post op visit by 8:00 AM.

We also offer extended stay services for patients who will need more than 2 nights of care.
