Boomers IN BLOOM

Aging boomers looking to turn back time—at least on the surface—this one's for you. Developed specifically with boomers in mind by renowned board-certified* cosmetic surgeon Kirk Brandow, MD, FAACS, the Boomer Lift is an ideal choice for patients seeking to tighten the jowl, neck (think turkey neck) and jawline area without undergoing a traditional face-lift—sans unsightly scar! Customized for and targeted to the busy boomer lifestyle, the procedure is "redefining the concept of aging," says Brandow

of his trademarked lift, and "[it's] less invasive, less expensive and requires less downtime than a full face-Lift... with the scar completely hidden behind the ear." *Sign us up. Bala Cynwyd, Rittenhouse Square and Somers Point, brandowclinic.com*
