**Kirk Brandow, MD, FAACS**, is a leading figure in cosmetic surgery, known for his excellence, innovation, and compassion. With over 30 years of experience, his success is rooted in a deep connection to art and beauty, enabling him to achieve natural, age-appropriate results. His goal is to help his patients see a younger, refreshed version of themselves in the mirror.

Dr. Brandow's journey began with a strong foundation in general surgery, plastic surgery, followed by fellowship training in cosmetic surgery. He pursued excellence through global training, studying under world-renowned Aesthetic surgery expert, Dr. Ivo Pitanguy, in Rio de Janeiro.

His meticulous attention to detail and artistry have earned Dr. Brandow a reputation for delivering results that enhance each patient's unique beauty.

His compassionate approach ensures that every individual's concerns are addressed and they feel cared for throughout their transformation.

Many patients refer to Dr. Brandow as their "Age Manager" because he guides them through the aging process over the decades of their lives. He will advise them when to undergo surgery or when to pursue more subtle, less invasive treatments such as Botox, fillers, lasers or peels.

During his training in Brazil, he realized that subtle and discreet, minor procedures help patients to look fresh and natural while avoiding the stigma of looking "overdone".

At his Main Line, PA and Somers Point, NJ offices, Dr. Brandow integrates cutting-edge procedures and state-of-the-art techniques to refine the standards in cosmetic surgery. He has been featured in publications such as *Cosmopolitan*, *Life & Style*, *In Touch*, *Allure*, and *Self*, and has shared his research with peers in the field.

Dr Brandow is deeply involved in philanthropy and community engagement in both Philadelphia and New Jersey. He and his wife attend charity events and societal functions, building strong relationships with the communities he serves.

### Surgical Aesthetics

The business of cosmetic plastic surgery

Results by Kirk Brandow, MD, FAACS

### The Boomer Lift

Along with a facelift, a neck procedure to tighten the neck and jaw

For many patients, the neck is the most noticeable area of aging. A neck lift can help restore a youthful appearance by tightening the skin and underlying tissues. This procedure is often performed in conjunction with a facelift. The results are long-lasting and can significantly improve the overall appearance of the face.

### Notable Press

Dear Mr. Brandow,  
My office was present all last week with the about of the lovely flowers you sent me. Thank you so much.  
And, thank you so much for participating in my story on liposuction. Your presence was a wonderful addition to my piece. You were honest, clear and candid—exactly the characteristics for which every television news magazine producer searches. What's more, your interaction with Frank came across as both professional and sympathetic.  
I am certain that's why I have received numerous requests for your office number. I can only assume that the enthusiasm at the Foxman Cosmetic Surgery Clinic must be lit up with calls from 24/20 viewers. Because, I am still receiving phone calls and letters asking for the name of the "number 1 Philadelphia" being by the enormous interest in the story. I don't think you'll be vacationing any time soon. (Galle)  
The liposuction story was one of the most enjoyable stories I have produced here at 20/20. In my nearly ten years of work on the show, I can recall only a few stories in which I liked everybody I interviewed. Believe me, it was a real treat.  
Now that you are an even bigger celebrity, I hope you will continue to take my calls.  
Again, thanks so much.  
Sincerely,  
Callie Crowley
